

## HR SERIES

### General Purpose LVDT

#### SPECIFICATIONS

- ◆ High Reliability
- ◆ Large core-to-bore clearance
- ◆ Stroke ranges from  $\pm 0.05$  to  $\pm 10$  inches
- ◆ AC operation from 400Hz to 5kHz
- ◆ Stainless steel housing
- ◆ Imperial or metric threaded core
- ◆ Many options and accessories

The **HR Series** general purpose LVDTs provide the optimum performance required for a majority of applications. The large 1/16 inch [1.6mm] bore-to-core radial clearance provides for ample installation misalignments and therefore reduces the application costs. Featuring a high output voltage and a broad operating frequency range, these versatile and highly reliable LVDTs deliver worry-free and precise position measurements.

Available in a variety of stroke ranges from  $\pm 0.05$  to  $\pm 10$  inches, the HR Series can be configured with a number of standard options including guided core, small diameter/low mass core. High temperature (200°C) operation and Mild Radiation Resistance versions are also available (*consult factory*). The HR Series is compatible with the full line of Measurement Specialties LVDT signal conditioners.

Like in most of our LVDTs, the HR windings are vacuum impregnated with a specially formulated, high temperature, flexible resin, and the coil assembly is potted inside its housing with a two-component epoxy. This provides excellent protection against hostile environments such as high humidity, vibration and shock.

#### FEATURES
